

### 22ADP-186..

Differential pressure sensor Air

Differential pressure transmitter with 8 selectable ranges and outputs 0...5 V, 0...10 V or 4...20 mA. For monitoring the differential pressure of air and other non-flammable and non-aggressive gases. Typical application in HVAC systems for monitoring air filters, fans V-belts as well as the use in pressure differential systems. Options available with LCD display, auto-zero feature. IP65 / NEMA 4X rated enclosure.

#### **Type Overview**

| Туре       | Measuring range<br>pressure [Pa] | Output signal active pressure | Burst pressure | Display type | Additional features |

|  |  |   |  |

Notes When switching from 0...10 V to 0...5 V output voltage also the current will be adjusted from 4...20 mA to 4...12 mA.

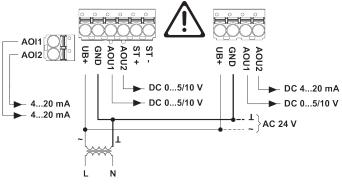

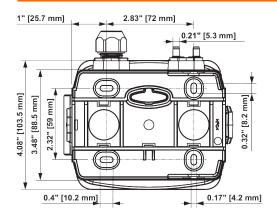

Wiring note power supply AC

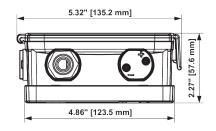

For the sensor to function properly, polarity must be observed with a DC supply as well as an AC supply. If the AC supply is connected incorrectly, i.e. if the wires are reversed, this can lead to the destruction of the sensor.
