

Frese OPTIMA Compact DN10-DN50 Pressure Independent Balancing & Control Valve

Application

Frese OPTIMA Compact pressure independent balancing & control valve (PIBCV) is used in heating and cooling systems in applications with Fan Coil Units, Chilled Beams or other terminal unit applications.

Frese OPTIMA Compact provides modulating control with full authority regardless of any fluctuations in the differential pressure of the system.

Frese OPTIMA Compact combines an externally adjustable automatic balancing valve, a differential pressure control valve and a full authority modulating control valve.

Frese OPTIMA Compact makes it simple to achieve 100% control of the water flow in the building, while creating high comfort and energy savings at the same time.

An additional benefit is that no balancing is required if further stages are added to the system, or if the dimensioned capacity is changed.

Energy saving due to optimal control, lower flow and pump pressure. Maximized ΔT due to faster response and increased system stability.

Benefits

Design

- Less time to define the necessary equipment for a hydraulic balanced system (only flow data are required)
- No need to calculate valve authority. Always one.
- Flexibility if the system is modified after the initial installation

Installation

- No further regulating valves required in the distribution pipework when Frese OPTIMA Compact is installed at terminals.
- Total number of valves minimized due to the 3-in-1 design
- Minimized commissioning time due to automatic balancing of the system
- No minimum straight pipe lengths required before or after the valve.

Operation

- High comfort for the end-users due to high precision temperature control
- Longer life due to less movements of the actuator

Features

- The presetting function has no impact on the stroke; Full stroke modulation at all times, regardless the preset flow.
- The constant differential pressure across the modulating control component guarantees 100% authority.
- Automatic balancing eliminates overflows, regardless of fluctuating pressure conditions in the system.
- Thermic actuator On/Off or 0-10V, normally closed.
- Motoric actuator 0-10V, (Linear or Logarithmic) or 3 point control.
- Differential pressure operating range up to 800 kPa
- High flows with minimal required differential pressure due to advanced design of the valve
- Small dimensions due to compact housing
- Higher presetting precision due to stepless analogue scale
- Rangeability > 100:1

Frese OPTIMA Compact DN10-DN50 Pressure Independent Balancing & Control Valve

Function

Frese OPTIMA Compact can be flushed and commissioned before the actuator is installed.

The presetting of the dial is user-friendly requiring only a simple flow vs. presetting graph. Once the flow is set, the actuator can be mounted and the valve ready to operate.

For lowest energy consumption, check the differential pressure at the index valve to set the pump at minimum speed.

Operating Pressure

The Frese OPTIMA Compact (DN10 to DN50) can operate to a maximum differential pressure of 800 kPa (8 bar)

Close Off Pressure

The Frese OPTIMA Compact is capable of closing against the following differential pressures to EN 1349 Class IV:

- DN10 to DN25: 600 kPa (6 bar) - based on 100N actuator force
- DN10 to DN25: 800 kPa (8 bar) - based on 160N actuator force
- DN25L to DN32: 800 kPa (8 bar) - based on 100N actuator force
- DN40 to DN50: 800 kPa (8 bar) - based on 400N actuator force

Isolation

When fitted with the isolation cap (DN10 to DN32 only), the Frese OPTIMA Compact is capable of isolation to 10 bar.

Design

The design of Frese OPTIMA Compact combines high performance with small size and compact construction. The main components of the valve are:

- ① Differential pressure control
- ② Modulating control component
- ③ Presetting scale (not accessible when the actuator is mounted)
 - a) Flow range: Low-High
 - b) Stroke: 2,5 - 5,0 - 5,5mm
- ④ P/T Plugs (Optional)
- ⑤ Actuator

Frese OPTIMA Compact DN10-DN50 Pressure Independent Balancing & Control Valve

Operation principle

The innovative design of Frese OPTIMA Compact features a modulating control component that retains 100% authority at all times.

With the Frese OPTIMA Compact, there are two independent movements for the presetting and the modulating function. During presetting, the inlet area moves radially without interfering with the length of the stroke. During modulating, the inlet area moves axial taking advantage of the full stroke.

Whilst the control component provides proportional modulation irrespective of the preset flow, the automatic balancing guarantees that the flow will never exceed the maximum preset flow.

Regardless of pressure fluctuations in the system, the maximum flow is kept constant up to a maximum differential pressure of 800 kPa.

Flow rate vs. Differential Pressure

Preset flow: 300 l/h, 150 l/h

Flow rate vs. Voltage

Preset flow: 200 l/h

Flow rate vs. Differential Pressure

Voltage: 10V, 7V, 3V

Frese OPTIMA Compact DN10-DN50 Pressure Independent Balancing & Control Valve

Technical data

Valve housing:

DN10-15-20-25-32

DZR Brass

DN40-50

Ductile Iron

DP controller:

PPS 40% glass

Spring:

Stainless steel

Diaphragm:

HNBR

O-rings:

EPDM

Pressure class:

PN25

Max. differential pressure:

800 kPa

Needles for DP measurement:

Max diameter, $\varnothing 3.2$ mm
Length, 25 - 40 mm

Thread:

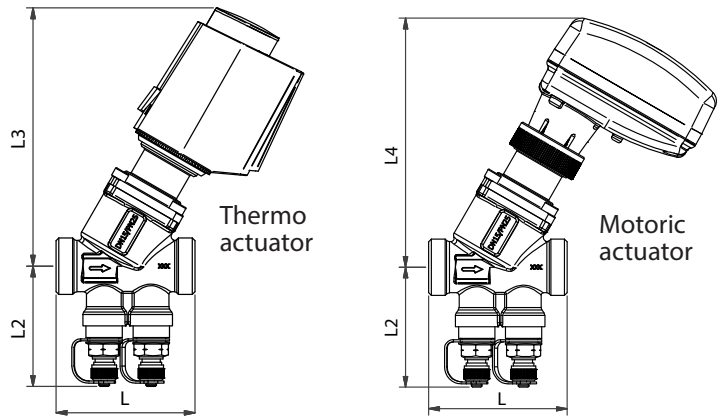

ISO 228

Medium temperature range:

-10°C to 120°C

When used at temperatures below 0°C, a stem heater must be used, to prevent ice on the spindle

The pipe system shall be properly ventilated to avoid risk of air pockets. Glycolic mixtures up to 50% are applicable (both ethylene and propylene).
Recommendation: Water treatment to VDI 2035.
Frese A/S can accept no responsibility if another actuator is used instead of the Frese actuator.

Technical data actuator DN 40-50 - actuator included with the valve

Characteristics:	Motoric, modulating
Protection class:	IP 54 to EN 60529
Frequency AC:	50/60 Hz
Supply voltage:	24V AC/DC
Control signal:	0-10V DC or 3 position
Actuating force:	400 N
Stroke max:	32 mm, selfcalibrating
Running time:	60 s
Ambient operating conditions:	-10°C to 50°C
Manual operation:	Manual handle
Cable:	Not included
Weight:	1.80 kg

Frese OPTIMA Compact DN10-DN50 Pressure Independent Balancing & Control Valve

Actuator requirements DN 10-15-20-25-32

Dimension "X" in closed position
 2.5 mm stroke = 11.4 mm
 5.0 mm stroke = 9.3 mm
 5.5 mm stroke = 8.8 mm

Actuator minimum force: 100N

Actuator connection: M30 x 1,5mm

Combination matrix: Frese OPTIMA Compact DN10-15-20-25-32 / Actuators

Frese OPTIMA Compact can be combined with both Thermo actuators and Motoric actuators.

The design of the valve, combined with the Frese actuator, produces a perfect control characteristic that utilises the full control range of the system.
