## Air damper actuators

## GEB...1

Rotary version, AC 24 V / AC 230 V

---

**Electronic motor driven actuators for three-position and modulating control, nominal torque 15 Nm, self-centering shaft adapter, mechanically adjustable span between 0...90°, prewired with 0.9 m long connection cables. Type-specific variations with adjustable offset and span for the positioning signal, position indicator, feedback potentiometer, self-adaptation of the rotary angle range, and adjustable auxiliary switches for supplementary functions.**

### Remarks

This data sheet provides a brief overview of these actuators. Please refer to the technical basics in Z4621en for a detailed description as well as information on safety, engineering notes, mounting and commissioning.

### Use

- For damper areas up to 3 m<sup>2</sup>, friction-dependent.
- Suitable for modulating controllers (DC 0...10 V) or three-position controllers (e.g. for outside air dampers).
- For dampers having two actuators on the same damper shaft (tandem-mounted actuators or Powerpack).

## Functions

Type	GEB13..1 / GEB33...1	GEB16..1
Control type	Three-position control	Modulating control
Positioning signal with adjustable characteristic function		DC 0...35 V with Offset $U_o = 0...5 V$ and span $\Delta U = 2...30 V$
Rotary direction	Clockwise or counter-clockwise direction depends... ...the type of control. With no power applied, the actuator remains in the respective position.	
Position indication: Mechanical	Rotary angle position indication by using a position indicator.	
Position indication: Electrical	The feedback potentiometer can be connected to external voltage to indicate the position.	Position indicator: Output voltage $U = DC 0...10 V$ is generated proportional to the rotary angle. $U$ depends on the rotary direction of the DIL switch.
Auxiliary switch	The switching points for auxiliary switches A and B can be set independent of each other in increments of 5° within 0° to 90°.	
Self-adaptation of rotary angle range		When self-adaptation is active, the actuator automatically determines the mechanical end positions of the rotary angle range and maps the characteristic function ( $U_o, \Delta U$ ) to the calculated rotary angle range.
Powerpack	Mounting two of the same actuator types on the same damper shaft may result in a double torque.	Not permitted.
Rotary angle limitation	The rotary angle of the shaft adapter can be limited mechanically at increments of 5°.	

## Ordering

### Note

Potentiometer and **cannot be added in the field**. For this reason, order the type that includes the required options.

### Delivery

Individual parts such as position indicator and other mounting materials for the actuator are **not mounted** on delivery.

Accessories, spare parts

Accessories to functionally extend the actuators are available, e.g., rotary/linear sets, auxiliary switches (1 or 2 switches) and weather protection cover; see data sheet **N4697**.

**Disposal**

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
