SIEMENS 4606

OpenAir™

# Residential Air damper actuators

**GSD...6 GQD...6** 

Rotary version, AC/DC 24 V and AC 230 V

GSD...6

- Electric motor driven actuators for open-close control (2-wire, SPDT)
- 2 Nm nominal torque
- AC/DC 24 V or AC 230 V rated voltage
- Pre-wired with 0.9 m cable
- Version with RJ12 jack

GQD...6

- Electric motor driven actuators for 2-position control
- 2 Nm nominal torque
- Spring return
- AC/DC 24 V or AC 230 V rated voltage
- Pre-wired with 0.9 m cable

Use

- For damper areas up to 0.3 m² or barrel dampers up to 12", friction dependent.
- For directly driven zone dampers used to control air flow in ducts.

# **Type Summary**

Non-spring return rotary air damper actuators

Туре	Operating voltage	Control signal	Cable length	Coupling
GSD141.6A	AC/DC 24 V	Open-close 2)	0.9 m	Ø 8 mm
GSD141.6K <sup>1)</sup>	AC/DC 24 V	Open-close 2)	RJ12 jack	Ø 8 mm
GSD341.6A 1)	AC 230 V	Open-close 2)	0.9 m	Ø 8 mm

**Spring return -** rotary air damper actuators

Туре	Operating voltage	Control signal	Cable length	Coupling
GQD121.6A	AC/DC 24 V	2-position	0.9 m	Ø 8 mm
GQD321.6A	AC 230 V	2-position	0.9 m	Ø 8 mm

<sup>1)</sup> While stocks last

# **Functions**

Туре	GSD141.6 <sup>1)</sup> GSD341.6A <sup>1)</sup>	GQD121.6A GQD321.6A
Control type	Open-close 2)	2-position
Rotary direction	Clockwise or counter-clockwise movement depends on the wiring of the actuator.	
Spring return		On power failure or when the operating voltage is switched off, the spring returns the actuator to its mechanical zero.

#### Mechanical design

#### **Basic components**

Housing Gear train Fiberglass reinforced plastic Maintenance-free, low-noise

### **Engineering notes**

#### **STOP**

This section explains general and system-specific regulations for mains and operating voltages. It also contains important information regarding your own safety and that for your plant.

#### Intended use

Use these actuators as described in the basic system documentation for the applied control systems. Additionally, take account of all actuator-specific features and conditions as described in the brief description on the front page of this data sheet (bold print) and in the sections "Use", "Engineering Notes" and "Technical Data".

The sections flagged with the warning symbol illustrated in the left margin contain safety-related requirements and restrictions. It is important that these are adhered in order to prevent physical injury and equipment damage.

AC/DC 24 V supply

Operate the actuators only on safety extra-low voltage (SELV) or protective extralow voltage (PELV) as per HD 384.

AC 230 V supply

The actuators are double-insulated and there is no connection for the protective ground.

#### **CAUTION**

#### Do not open the actuator!

- The actuators are maintenance-free.
- Any repair work must be conducted by the manufacturer only.
- Opening the actuator will void the warranty.
- Spring return actuators contain pre-tensioned springs. Only trained personnel may open such actuators (by means of special tools).

#### Parallel connection

Up to 10 actuators of the same type can be electrically wired in parallel. The admissible cable length and cable cross-section must be observed.

# Sizing transformers for AC 24 V

Use safety insulating transformers as per EN 61 558 with double insulation, designed for 100 % duty to supply SELV or PELV circuits.

Observe all local safety rules and regulations pertaining to the sizing and protection of transformers.

Determine the transformer power consumption by adding up the power consumption in VA for all actuators used.

Wiring and commissioning

Refer to the sections "Commissioning Notes" and "Wiring Diagrams" in this data sheet as well as to the HVAC job drawings.

#### **Mounting notes**

Mounting instructions

All information and steps to properly prepare and mount the actuator are listed in the mounting instructions supplied with the actuator.

Mounting position

Mount the actuator in a position which ensures easy access to the cables and to the shaft adapter. Refer to the "Dimensions" section.

Damper shafts

Information on minimum length and diameter for the damper shaft is available in the "Technical Data" section.

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

#### **Commissioning notes**

References For commissioning, the following reference documentation must be available:

· This data sheet

· Job diagram

Ambient conditions Check to ensure that all permissible values, as contained in the section "Technical

Data", have been observed.

Check the direction of rotation.

Mechanical check
 Check for proper mounting and ensure that all mechanical settings correspond to the plant-specific requirements. Additionally, ensure that the dampers are

tightly closed when in the closed position.

• Fasten the actuator securely to avoid twisting and blocking of the actuator.

Electrical check • Check to ensure that the cables are connected in accordance with the plant

wiring diagram (see "Wiring Diagrams").

• The operating voltage AC/DC 24 V (SELV/PELV) or AC 230 V must be within

the tolerance values.
