

Rotary actuator for butterfly valves

• Torque motor 160 Nm (parametrised for D6250W/WL)

- Nominal voltage AC 24...240 V / DC 24...125 V
- Control modulating, communicative, hybrid
- with 2 integrated auxiliary switches
- Conversion of sensor signals

• Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control

Technical data sheet

Electrical data	Nominal voltage	AC 24240 V / DC 24125 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2264 V / DC 19.2137.5 V
	Power consumption in operation	20 W
	Power consumption in rest position	6 W
	Power consumption for wire sizing	with 24 V 20 VA / with 230 V 52 VA
	Auxiliary switch	2 x SPDT, 1 x 10° / 1 x 090° (default setting 85°)
	Switching capacity auxiliary switch	1 mA3 A (0.5 A inductive), AC 250 V
	Connection supply	Terminals 2.5 mm ²
	Connection protective earth	earth terminal
	Connection control	Terminals 1.5 mm ²
	Connection auxiliary switch	Terminals 2.5 mm ²
	Parallel operation	Yes (note the performance data)
Functional data	Torque motor	160 Nm (parametrised for D6250W/WL)
	Communicative control	BACnet MS/TP
		Modbus RTU
		MP-Bus
	Operating range Y	210 V
	Input Impedance	100 kΩ
	Operating range Y variable	0.510 V
		420 mA
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	0.510 V
	Position accuracy	<u>±5%</u>
	Manual override	hand lever
	Running time motor	35 s / 90°
	Running time motor variable	30120 s
	Sound power level, motor	68 dB(A)
	Position indication	Mechanically (integrated)
Safety data	Protection class IEC/EN	I protective earth (PE)
	Protection class UL	I protective earth (PE)
	Degree of protection IEC/EN	IP66/67
	Degree of protection NEMA/UL	NEMA 4X
	Enclosure	UL Enclosure Type 4X
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Certification UL	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1:02

	Certification UL note	The UL marking on the actuator depends on the production site, the device is UL-compliant in any case
	Mode of operation	Туре 1
	Rated impulse voltage supply	4 kV
	Rated impulse voltage control	0.8 kV
	Rated impulse voltage auxiliary switch	2.5 kV
	Control pollution degree	3
	Ambient temperature	-3050°C
	Storage temperature	-4080°C
	Ambient humidity	Max. 100% r.H.
	Servicing	maintenance-free
Mechanical data	Connection flange	F07 (F05 only with accessory)
Weight	Weight	5.8 kg

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems
 and must not be used outside the specified field of application, especially in aircraft or in any other
 airborne means of transport.
- Caution: Power supply voltage!
- The device has a protective earthing. Incorrect connection of the protective earth can lead to hazards due to electrical shock.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- Apart from the connection box, the device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/safety extra-low voltage is not permitted.

Product features

Fields of application	The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions: - UV radiation - Dirt / Dust - Rain / Snow - Air humidity
Converter for sensors	Connection option for two sensors (passive, active or switching contacts). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems BACnet or Modbus.
Configurable actuators	The factory settings cover the most common applications.
	The Belimo Assistant App is required for parametrisation via Near Field Communication (NFC) and simplifies commissioning. Moreover, it provides a variety of diagnostic options.
	The ZTH EU service tool provides a selection of both diagnostic and setting options.
Combination analogue - communicative (hybrid mode)	With conventional control by means of an analogue positioning signal, BACnet or Modbus can be used for the communicative position feedback
Simple direct mounting	Simple direct mounting on the butterfly valve. The mounting orientation in relation to the butterfly valve can be selected in 90° (angle) increments.
Manual override	The valve can be manually operated using a hand crank. Unlocking is carried out manually by removing the hand crank.
Internal heating	An internal heater prevents condensation buildup.

(0...90°).

Thanks to the integrated temperature and humidity sensor, the built-in heater automatically switches on/ off.

High functional reliabilityThe actuator is overload protected, requires no limit switches and automatically stops when the end stop
is reached.Flexible signallingThe actuator has one auxiliary switch with a fixed setting (10°) and one adjustable auxiliary switch

Electrical installation

Caution: Power supply voltage!

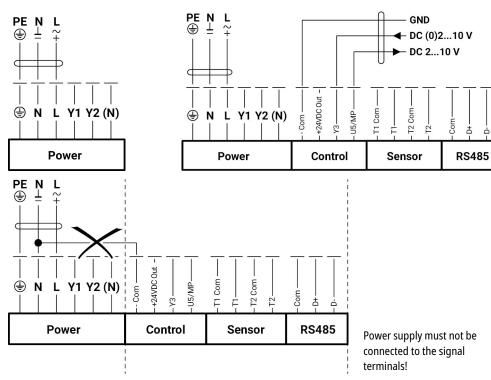

Parallel connection of other actuators possible. Observe the performance data.

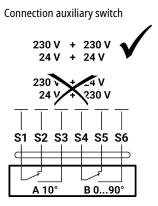

The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS485 regulations.

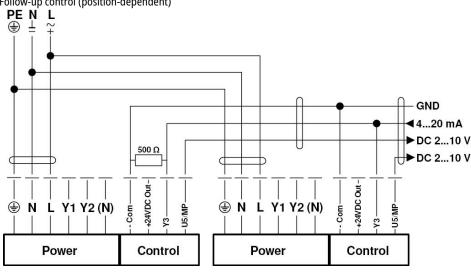

Wiring diagrams AC 24...240 V / DC 24...125 V

Modulating control

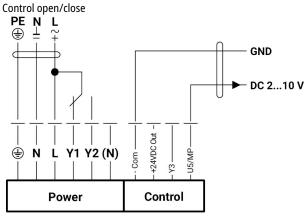

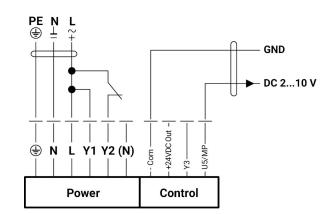

Follow-up control (position-dependent)

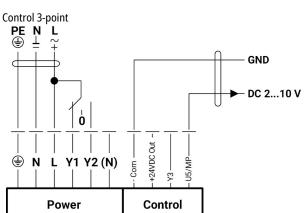

Functions

Functions for actuators with specific parameters (NFC)

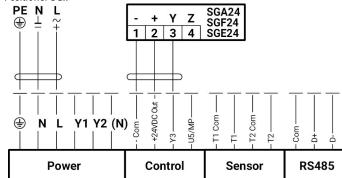

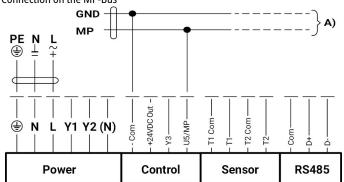

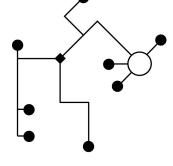

Positioner SG..

Connection on the MP-Bus

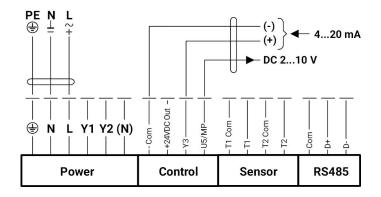

MP-Bus Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted). Supply and communication in one and the same 3-wire cable

- no shielding or twisting necessary
- no terminating resistors required

Control 4...20 mA

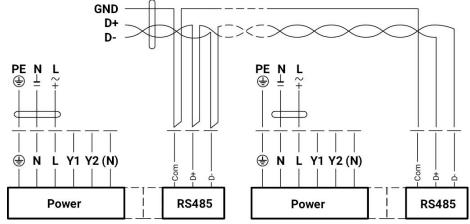

Note

Maximum output power «DC 24 V out» 1.2 W @ 50 mA! A separate safety transformer must be used for higher performance!

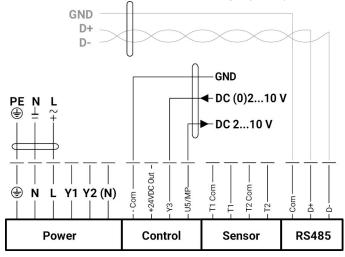

A) Additional actuators (max. 8)

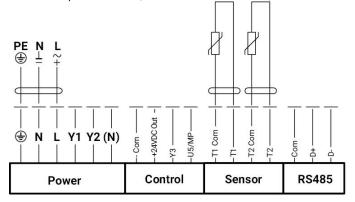

Connection BACnet MS/TP / Modbus RTU

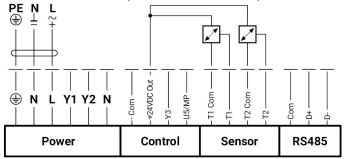

Connection BACnet MS/TP / Modbus RTU with analog setpoint (hybrid mode)

Connection of passive sensors (BACnet MS/TP / Modbus RTU)

Connection of active sensors (BACnet MS/TP / Modbus RTU)

1)	2)
200 Ω2 kΩ	0.1 Ω
2 kΩ10 kΩ	1Ω
10 kΩ55 kΩ	10 Ω

1) Resistance range

2) Resolution

- Suitable for Ni1000 and Pt1000

- Suitable Belimo types 01DT-...

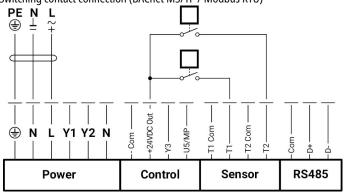

Possible input voltage range: DC 0...10 V (resolution 5 mV) For example, to capture: - Active temperature sensors

- Flow sensors

- Pressure / differential pressure sensors

Switching contact connection (BACnet MS/TP / Modbus RTU)

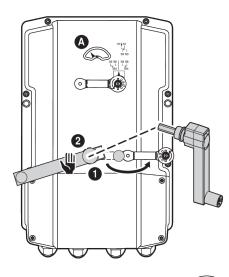

Requirements for switching contact: The switching contact must be able to accurately switch a current of 10 mA @ 24 V. For example, to capture: - Flow monitors

- Operation / malfunction
- messages of chillers

Operating controls and indicators

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

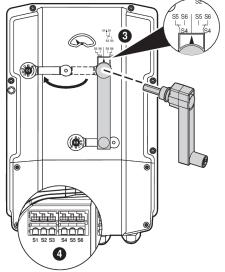

For the auxiliary switch position settings, carry out points 0 to 0 successively.

Gear disengagement

Opening the manual override cover and adjusting the hand crank. Manual override is possible.

Manual override control 2

Turn the hand crank until the desired switching position A is indicated and then remove the crank.

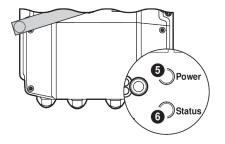

Auxiliary switch 3

For the auxiliary switch position settings, carry out points 1 to 3 successively. Opening the auxiliary switch adjustment cover and adjusting the hand crank. Turn the crank until the arrow points to the vertical line

Terminals 4

Connect continuity tester to S4 + S5 or to S4 + S6. If the auxiliary switch should switch in the opposite direction, rotate the hand crank by 180°.

Push-button and display

Push-button and LED display green 5

No power supply or malfunction In operation Press button: Triggers test run, followed by standard mode

Push-button and LED display yellow

Standard mode Test run active BACnet / Modbus communication active Request for addressing from MP master Confirmation of the MP addressing

Service

NFC connection

Belimo devices marked with the NFC logo can be operated with the Belimo Assistant App.

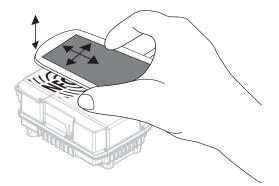

Requirement:

- NFC- or Bluetooth-capable smartphone
- Belimo Assistant App (Google Play & Apple AppStore)

Align NFC-capable smartphone on the device so that both NFC antennas are superposed.

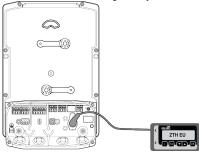

Connect Bluetooth-enabled smartphone via the Bluetooth-to-NFC Converter ZIP-BT-NFC to the device. Technical data and operation instructions are shown in the ZIP-BT-NFC data sheet.

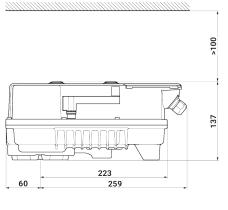

Service Tools connection

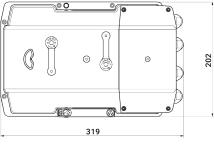

The actuator can be configured by the ZTH EU via the service socket.
