

Configurable rotary actuator fail-safe in the IP66/67 protective housing for adjusting dampers in industrial plants and in technical building installations

- Air damper size up to approx. 4 m²
- Torque motor 20 Nm
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V variable
- Position feedback 2...10 V variable
- Optimum weather protection for use outdoors (for use in ambient temperatures up to -40°C, there is a separate actuator available with built-in heater ex works)

Technical data

| Electrical data | Nominal voltage | AC/DC 24 V |
|-----------------|------------------------------------|--|
| | Nominal voltage frequency | 50/60 Hz |
| | Nominal voltage range | AC 19.228.8 V / DC 21.628.8 V |
| | Power consumption in operation | 8.5 W |
| | Power consumption in rest position | 3.5 W |
| | Power consumption for wire sizing | 11 VA |
| | Connection supply / control | Cable 1 m, 4 x 0.75 mm ² (halogen-free) |
| | Parallel operation | Yes (note the performance data) |
| Functional data | Torque motor | 20 Nm |
| | Torque fail-safe | 20 Nm |
| | Operating range Y | 210 V |

| Power consumption in rest position | 3.5 VV |
|------------------------------------|---|
| Power consumption for wire sizing | 11 VA |
| Connection supply / control | Cable 1 m, 4 x 0.75 mm ² (halogen-free) |
| Parallel operation | Yes (note the performance data) |
| Torque motor | 20 Nm |
| Torque fail-safe | 20 Nm |
| Operating range Y | 210 V |
| Input Impedance | 100 kΩ |
| Options positioning signal | Open/close |
| 1 1 3 3 | 3-point (AC only) |
| | Modulating (DC 032 V) |
| Operating range Y variable | Start point 0.530 V |
| | End point 2.532 V |
| Position feedback U | 210 V |
| Position feedback U note | Max. 0.5 mA |
| Position feedback U variable | Start point 0.58 V |
| | End point 2.510 V |
| Position accuracy | ±5% |
| Direction of motion motor | selectable with switch L/R |
| Direction of motion note | Y = 0 V: At switch position 0 (ccw rotation) / |
| | 1 (cw rotation) |
| Direction of motion variable | electronically reversible |
| Direction of motion fail-safe | L (ccw) |
| Manual override | by means of hand crank and locking switch |
| Angle of rotation | Max. 95° |
| Angle of rotation note | adjustable starting at 33% in 2.5% steps (with mechanical end stop) |
| Running time motor | 150 s / 90° |
| Running time motor variable | 70220 s |
| Running time fail-safe | <20 s / 90° |
| Running time fail-safe note | @ -2050°C / <60 s @ -30°C |
| Adaptation setting range | manual |
| Adaptation setting range variable | No action |
| | Adaptation when switched on |
| | Adaptation after using the hand crank |
| Override control | MAX (maximum position) = 100% |
| | MIN (minimum position) = 0% |
| | ZS (intermediate position, AC only) = 50% |
| Override control variable | MAX = (MIN + 32%)100% |
| | MIN = 0%(MAX – 32%) |
| Country level makes | ZS = MINMAX |
| Sound power level, motor | 40 dB(A) |
| Mechanical interface | Universal shaft clamp 1226.7 mm |
| Position indication | Mechanically, pluggable |
| Service life | Min. 60'000 fail-safe positions |

Rotary actuator fail-safe, IP66/67, parametrisable, modulating, AC/DC 24 V, 20 Nm

Technical data

| Safety | Protection class IEC/EN | III Safety Extra-Low Voltage (SELV) |
|--------|--|---|
| | Protection class UL | UL Class 2 Supply |
| | Degree of protection IEC/EN | IP66/67 |
| | Degree of protection NEMA/UL | NEMA 4X |
| | Enclosure | UL Enclosure Type 4X |
| | EMC | CE according to 2014/30/EU |
| | Certification IEC/EN | IEC/EN 60730-1 and IEC/EN 60730-2-14 |
| | Certification UL | cULus according to UL60730-1A, UL60730-2- 14 and CAN/CSA E60730-1:02 |
| | Certification UL note | The UL marking on the actuator depends on the production site, the device is UL-compliant in any case |
| | Mode of operation | Type 1.AA |
| | Rated impulse voltage supply / control | 0.8 kV |
| | Control pollution degree | 4 |

Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- Junction boxes must at least correspond with enclosure IP degree of protection!
- The cover of the protective housing may be opened for adjustment and servicing. When it is closed afterwards, the housing must seal tight (see installation instructions).
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The cables must not be removed from the device installed in the interior.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- · The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- The actuator is not designed for applications where chemical influences (gases, fluids) are present or for utilisation in corrosive environments in general.
- The actuator may not be used in plenary applications (e.g. suspended ceilings or raised floors).
- The materials used may be subjected to external influences (temperature, pressure, construction fastening, effect of chemical substances, etc.), which cannot be simulated in laboratory tests or field trials. In case of doubt, we definitely recommend that you carry out a test. This information does not imply any legal entitlement. Belimo will not be held liable and will provide no warranty.
- Flexible metallic cable conduits or threaded cable conduits of equal value are to be used for UL (NEMA) Type 4X applications.
- · When used under high UV loads, e.g. extreme sunlight, the use of flexible metallic or equivalent cable conduits is recommended.

Rotary actuator fail-safe, IP66/67, parametrisable, modulating, AC/DC 24 V, 20 Nm

Product features

Fields of application

The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions:

- UV radiation
- Rain / Snow
- Dirt / Dust
- Air humidity
- Alternating climate / frequent and severe temperature fluctuations (Recommendation: use the actuator with integrated factory-installed heating which can be ordered separately to prevent internal condensation)

Mode of operation

The actuator moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the fail-safe position by spring force when the supply voltage is interrupted.

The actuator is connected with a standard modulating signal of 0...10 V and drives to the position defined by the positioning signal. Measuring voltage U serves for the electrical display of the damper position 0.5...100% and as slave control signal for other actuators.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.

Simple direct mounting

Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

Manual override

By using the hand crank the damper can be actuated manually and engaged with the locking switch at any position. Unlocking is carried out manually or automatically by applying the operating voltage.

The housing cover must be removed for manual override.

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stop. The housing cover must be

removed to set the angle of rotation.

High functional reliability

The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Home position

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

Adaption and synchronisation

An adaption can be triggered manually by pressing the "Adaption" button or with the PC-Tool. Both mechanical end stops are detected during the adaption (entire setting range). Automatic synchronisation after actuating the hand crank is programmed. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)
