SIEMENS 4⁵⁷³

SQS35.50, SQS35.53, SQS65.5 with spring return function, without manual adjuster

SQS35.00, SQS35.03, SQS65, SQS65.2, SQS85.00, SQS85.03 without spring return function, with manual adjuster

 $\mathsf{ACVATIX}^\mathsf{TM}$

Electromotoric actuators

SQS35.. SQS85.. SQS65..

for valves with 5.5 mm stroke

- SQS35.. operating voltage AC 230 V, 3-position control signal
 SQS85.. operating voltage AC 24 V, 3-position control signal
- SQS65.. operating voltage AC 24 V, DC 0...10 V, DC 2...10 V or 0...1000 Ω control signal
- Positioning force 400 N
- · Direct mounting on valves; no adjustments required
- Optional auxiliary switch for extra functions with SQS35.00, SQS35.03, SQS85.00, SQS85.03
- With or without spring return function
- Position indication
- Manual adjuster on actuators without spring return function

Use

For operation of Siemens valves VVG44.., VVG55.. and VXG44.. with 5.5 mm stroke for water-side control of hot water and cooling water in heating, ventilation and air conditioning systems.

In conjunction with the ASK30 mounting kit, the former Landis & Gyr-valves with 4 mm or 5.5 mm stroke can also be operated: X3i.., VVG45.., VXG45.., VXG46.., VVI51...

Type reference	Operating voltage	Positioning signal		Positioning time	Spring return function	Spring return time
SQS35.00		3-position		150 s	No	
SQS35.03	AC 230 V			35 s	NO	
SQS35.50	AC 230 V			150 s	Voo	8 s
SQS35.53				35 s	Yes	os
SQS65.5		DC 010 V	DO 0 40 V		Yes	8 s
SQS65		DC 010 V	01000Ω	35 s		
SQS65.2	AC 24 V	DC 210 V			No	
SQS85.00		2		150 s	NO	
SQS85.03		3-pos	3-position			

¹⁾ Actuators SQS65 and SQS65.5 are UL-listed (only 60 Hz); type suffix ..U, e.g. SQS65U.

Accessories

Type reference	Description	For actuators	Space for
ASC9.6	Auxiliary switch Switching point adjustable from 0100 % stroke	SQS35.00, SQS35.03 SQS85.00, SQS85.03	1 x ASC9.6

Ordering

Example:	Product number	Stock number	Designation	Quantity
	SQS35.00	SQS35.00	Electromotoric actuator, stroke 5.5 mm	20
	ASC9.6	ASC9.6	Auxiliary switch	20

Delivery Actuators, valves and accessories are supplied in separate packages.

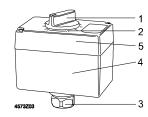

Spare parts, Rev.-Nr. See overview, page 9.

Equipment combinations

Type reference	DN	PN class	k _{vs} [m ³ /h]	Datasheet	SQS35	SQS65	SQS85
VVG44	15 10	PN 16	0.2525	N4364	✓	✓	✓
VXG44	1540	PIN IO	0.2525	N4464	✓	✓	✓
VVG55	1525	PN 25	0.256.3	N4379	✓	✓	✓

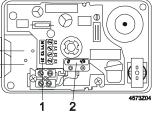

The reversible synchronous motor is driven by a 3-position or a proportional DC 0...10 V, DC 2...10 V or 0...1000 Ω control signal. The stroke is generated via an antilocking gear train.

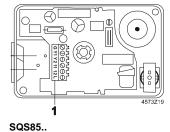

Design

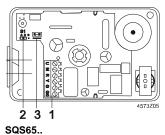

- Manual adjuster
 - (SQS35.00, SQS35.03, SQS65, SQS65.2, SQS85.00, SQS85.03)
- 2 Position indication
- 3 Coupling nut for valve neck
- 4 Housing
- Removable cover

Terminal strip, auxiliary switch

SQS35..

- 1 Terminal strip
- Auxiliary switch built-in as standard in SQS35.50, SQS35.53
- 1 Terminal strip
- 1 Terminal strip
- 2 «lin» / «log» connection
- 3 R M bridge

SQS35.., SQS85..

3-position control signal Voltage at Y1: Stem extends, valve opens Voltage at Y2: Stem retracts, valve closes

No voltage at Y1 or Y2: Actuator holds the current position

SQS35.50, SQS35.53

Spring return function

SQS65...

DC 0/2...10 V or $0...1000~\Omega~control$ signal

• The valve opens / closes in proportion to the control signal at Y or R.

At DC 0/2 V or 0 Ω the valve is closed (A \rightarrow AB).

valve. The Y positioning signal is not valued.

When power supply is removed, the actuator maintains its current position.

In the event of an AC 230 V power failure on terminal 21, the actuator will return

mechanically (return spring) to its 0 % stroke position within 8 seconds, closing the

SQS65.5

Spring return function

In the event of a power failure, the actuator will return mechanically (return spring) to its 0 % stroke position within 8 seconds, closing the valve. The Y positioning signal is not valued.

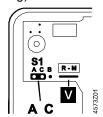

SQS65...

Selecting the flow characteristic

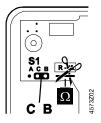

Connector S1 (under the cover, on the printed circuit board) can be repositioned to change the flow characteristic of valves from «equal percentage» to «linear»; in all cases the flow characteristic relates to the through-port of the valve.

Position of S1

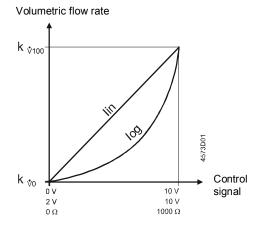

S1 connected to A and C: equal-percentage flow characteristic (factory setting)

S1 connected to B and C: linear flow characteristic

Flow characteristic

Relationship between the DC 0...10 V, DC 2...10 V or 0...1000 Ω control signal and the volumetric flow rate

Control signals:

Y = DC 0...10 V or DC 2...10V

R = $0...1000 \Omega$; cut through R – M bridge

Flow characteristic

log = Equal-percentage valve characteristic

(factory setting)

in = Linear valve characteristic

Flow range

 $k_{\dot{V}100}$ = Volumetric flow 100% $k_{\dot{V}0}$ = Volumetric flow 0 %

Priority of signals

Positioning signal Y	DC 0/210 V		DC 0/210 V
Signal R		01000 Ω ¹⁾	01000 Ω ¹⁾
Position / stroke	,	The R signal is valued.	Signal addition Y and R
Position feedback U	DC 010 V	DC 010 V	DC 010 V

Use with $0...1000~\Omega$ signal indicator, e.g. frost protection. For details see connection diagram

Features and benefits

- · Electromotoric actuator, maintenance-free
- · Reversible synchronous motor
- Antilocking gear train
- · Load-dependent switch-off in stroke limit positions

Engineering notes

The actuators must be electrically connected in accordance with local regulations and the connection diagrams.

Safety regulations and restrictions designed to ensure the safety of people and property must be observed at all times.

SQS65..

With the SQS65.. actuators, the connector used to select the flow characteristic must be set to «lin» for valve types VVG55..

Admissible temperatures refer to «Technical data»

If an auxiliary switch is required, its switching point should be indicated on the plant schematic.

Mounting notes

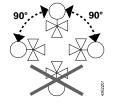

Mounting Instructions are enclosed in the product packaging.

Overview
Mounting Instructions

Type reference	Mounting Instructions	
SQS35	M4573.7	
SQS85	IVI4073.7	
ASC9.6	G4573.1	

Type reference	Mounting Instructions
SQS65.5	
SQS65	M4573.4
SQS65.2	

Orientation

Commissioning notes

When commissioning the system, check wiring and the functions. In addition, select or check the auxiliary switch settings.

Manual adjuster 🛆

Switching off the positioning signal.

The valve can be fully closed (= 0 % stroke) by turning the manual adjuster counterclockwise. Control is automatically resumed when the positioning signal returns.

3-position control

Every actuator must be driven by a dedicated controller (refer to «Connection diagrams»).

Maintenance notes

The actuators are maintenance-free.

When servicing the actuator:

- Switch off pump and power supply
- · Close the main shutoff valve in the pipework
- Release pressure in the pipes and allow them to cool down completely
- If necessary, disconnect electrical connections from the terminals

The actuator must be correctly fitted to the valve before recommissioning.

Repair

The actuator can not be repaired. It has to be replaced as a complete unit.

Disposal

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Warranty

The technical data relating to specific applications are valid only in conjunction with the valves listed in this Data Sheet under «Equipment combinations».

The use of the actuators in conjunction with third-party valves invalidates all claims under Siemens Switzerland Ltd / HVAC Products warranty.
