

# **Technical data sheet**

### Modulating rotary actuator with failsafe for ball valves

- Torque motor 20 Nm
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V
- Position feedback 2...10 V
- Deenergised open (NO)
- with 2 integrated auxiliary switches

# **Technical data**

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	5.5 W
	Power consumption in rest position	3 W
	Power consumption for wire sizing	8.5 VA
	Auxiliary switch	2 x SPDT, 1 x 10% / 1 x 1190%
	Switching capacity auxiliary switch	1 mA3 A (0.5 A inductive), AC 250 V
	Connection supply / control	Cable 1 m, 4 x 0.75 mm <sup>2</sup>
	Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm <sup>2</sup>
	Parallel operation	Yes (note the performance data)
Functional data	Torque motor	20 Nm
	Torque fail-safe	20 Nm
	Operating range Y	210 V
	Input Impedance	100 kΩ
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position accuracy	±5%
	Direction of motion motor	Y = 0 (0 V = A - AB = 0%)
	Direction of motion fail-safe	Deenergised NO, valve open $(A - AB = 100\%)$
	Manual override	by means of hand crank and locking switch
	Running time motor	90 s / 90°
	Running time fail-safe	<20 s / 90°
	Running time fail-safe note	@ -2050°C / <60 s @ -30°C
	Sound power level, motor	45 dB(A)
	Position indication	Mechanical
	Service life	Min. 60'000 fail-safe positions
Safety	Protection class IEC/EN	III Safety Extra-Low Voltage (SELV)
	Protection class UL	UL Class 2 Supply
	Protection class auxiliary switch IEC/EN	II reinforced insulation
	Degree of protection IEC/EN	IP54
	Degree of protection NEMA/UL	NEMA 2
	Enclosure	UL Enclosure Type 2
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Certification UL	cULus according to UL60730-1A, UL60730-2-
	Cartification III note	14 and CAN/CSA E60730-1:02
	Certification UL note	The UL marking on the actuator depends on the production site, the device is UL-compliant in
		any case
	Mode of operation	Type 1.AA.B
	Rated impulse voltage supply / control	0.8 kV
	Rated impulse voltage auxiliary switch	2.5 kV
	Control pollution degree	3
	Ambient temperature	-3050°C
	Storage temperature	-4080°C
	Ambient humidity	Max. 95% r.H., non-condensing

Rotary actuator fail-safe, modulating, AC/DC 24 V, 20 Nm, with 2 integrated auxiliary switches

Technical data		
Safety	Servicing	maintenance-free
Weight	Weight	2.4 kg
Safety notes		
	conditioning systems	designed for use in stationary heating, ventilation and air- and must not be used outside the specified field of application or in any other airborne means of transport.
	or aggressive gases	only possible in case that no (sea) water, snow, ice, insolation interfere directly with the actuator and that is ensured that the emain at any time within the thresholds according to the data
		ialists may carry out installation. All applicable legal or n regulations must be complied during installation.
		be opened at the manufacturer's site. It does not contain any laced or repaired by the user.
	Cables must not be r	emoved from the device.
		electrical and electronic components and must not be disposed se. All locally valid regulations and requirements must be
		egrated in the actuator are to be operated either on power safety extra-low voltage. The combination power supply voltage ge is not permitted.
Product features		
Mode of operation	moves the valve to the	ted with a standard modulating signal 010 V. The actuator operating position at the same time as tensioning the return ned back to the fail-safe position by spring force when the upted.
Simple direct mounting		on the ball valve with only one screw. The mounting orientation lve can be selected in 90° steps.
Manual override		k the valve can be operated manually and engaged with the osition. Unlocking is carried out manually or automatically by voltage.
Adjustable angle of rotation	Adjustable angle of rota	ation with mechanical end stops.
High functional reliability	The actuator is overloa when the end stop is re	d protected, requires no limit switches and automatically stops eached.
Flexible signalization		uxiliary switch with a fixed setting and one adjustable auxiliary 0% or 1190% angle of rotation to be signaled.
Electrical installation		
∧ Notes	Connection via safe	ty isolating transformer.

• Parallel connection of other actuators possible. Observe the performance data.

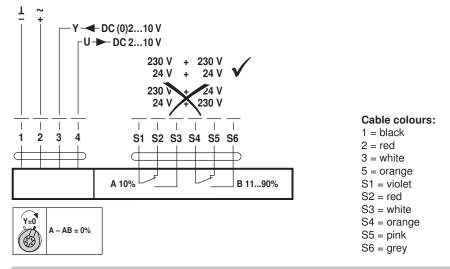

/!\

## **Electrical installation**

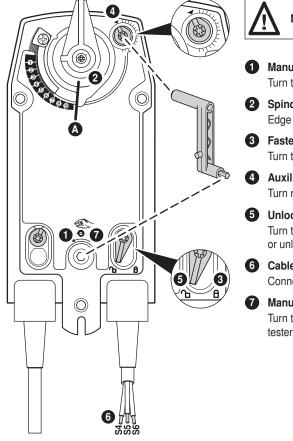

### Wiring diagrams

AC/DC 24 V, modulating

#### **Operating controls and indicators**

#### Auxiliary switch settings

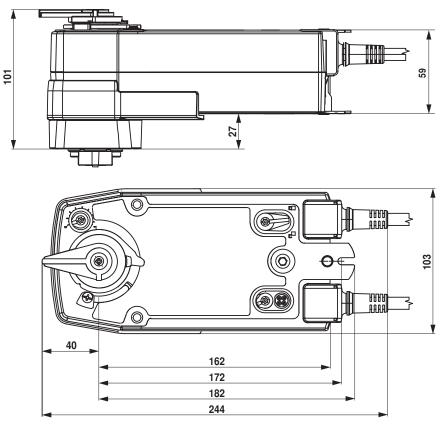

0	Manual override Turn the hand crank until the desired switching position is set.
2	Spindle clamp Edge line (A) displays the desired switching position of the actuator on the scale.
3	Fasten the locking device Turn the locking switch to the "Locked padlock" symbol.
4	Auxiliary switch Turn rotary knob until the notch points to the arrow symbol.
5	Unlock the locking device Turn the locking switch to the "Unlocked padlock" symbol or unlock with the hand crank.
6	Cable Connect continuity tester to S4 + S5 or to S4 + S6.
7	<b>Manual override</b> Turn the hand crank until the desired switching position is set and check whether the continuit tester shows the switching point.
